

# DCWarehouse Automation DCMobile

If you need to take orders outside your four walls, you may want to consider the DCMobile Module from DCSC Inc. This is an optional module that allows your team to do business anywhere. Combined with our powerful DCCredit Card Application, you can now handle your business to business transactions at trade-shows, on the road and from anywhere around the world. This solution may be used for stand-alone order entry with improved security, efficiency, speed and accuracy. The software is built using Microsoft®.Net Technology.

## Benefits include:

- Allows Mobility for your Sales Team on the Road and at Tradeshow!
- **Cost Effective Sales** and Customer Service.
- Cash-Flow Improvement by Taking and Processing Orders Immediately.
- Incorporation of Web Orders Directly into Your Business to Business Web Site.
- Intra-Net Opportunities for Sales Representatives.
- Sync Important Order and Inventory Information with your Sage MAS 500® ERP System.
- Allows you to add a New Customer or Edit Existing Customer Information.
- Authorize Credit Cards with the Order.
- Place Orders On Hold If Required.
- Quickly View Inventory In Multi-Warehouses.

If you are interested in the DCMobile® Application that extends the use of the Sage MAS 500® Application please contact us today! DCSC Inc. and our valued resellers proudly serve distributors, manufacturers and fulfillment companies across the nation and beyond.

Our team of developers are located in Saint Louis for speedy and efficient customer service. If you want this solution custom designed for your additional needs, we are pleased to serve you.
