

DCMOBILE

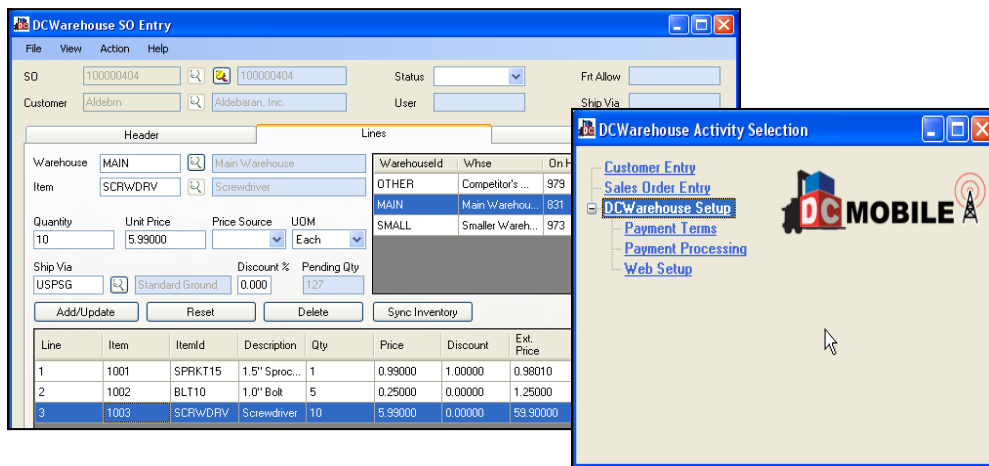

Process Orders Anywhere on Any Device

If you need to take orders outside your four walls, look no further than **DCMobile** from DCSC Inc. This optional add-on module for our [DCWarehouse Automation Suite](#) allows you to do business anywhere and on any device.

Combined with our powerful **DCCredit Card Application**, you can process transactions at trade-shows, on the road and from anywhere around the world. DCMobile can also be used for stand-alone order entry with improved security, efficiency, speed and accuracy.

Built with **Microsoft®.Net** technology, DCMobile offers both a client and web interface. If you don't have internet access, the client interface can be used offline with all of your information synched at a later point. The web interface can be used from any mobile device over the internet or your own private intra-net.
